

Ms Louisa Van Velden, CEO

ERW Concrete Products (Pty) Ltd was born out of a need to transform the walling industry in South Africa, which was based on a system that marginalised participation by blacks in the mainstream economy of South Africa.

It is a 100% black woman owned company. It has its own spectrum of black people (including women and youth) that benefit from the transformation process.

ERW Concrete Products (Pty) Ltd also encourage local labour participation for the youth. All employees in the company need to adhere to the highest standards of good corporate governance to improve the quality of service delivery.

The CEO, Ms. Louisa Van Velden's more than 30 years' experience in the concrete walling industry is a force to reckon with. She has surrounded herself with a competent management team to help her to establish and grow the company.

ERW Concrete Products has engaged with many role-players in the construction and civils industries; many of whom became loyal customers.

The product range on offer has been developed over many years; new items are being added consistently.

The biggest challenge most contractors experience is to find the right "designated" sub-contractors when submitting Government Tenders under the PPPFA regulations that came into effect on 1 April 2017.

Our quality products and services, together with our B-BBEE Level 2 (CSD verified registration number MAAA0480758) makes it much easier for you to work with ERW Concrete Products (Pty) Ltd as your precast walling and concrete palisade fencing partner.
